

GENERAL

Global warming and depletion of fossil energy resources lead politicians at international level to look for the diversification and promotion of Renewable Energies. Most countries are showing through their development programs an interest toward energy satisfaction in renewable energies and wind energy particularly. The aim of this Workshop is to set up strategies on how to promote the use of wind energy in Mediterranean basin. This is possible by sharing individual experience and opening prospects likely to interest industrials and public sector for research and investment in the domain.

TOPICS

TOPIC 1 : Wind Energy policy in the Mediterranean countries, Clean Development Mechanisms, standards & Certification

TOPIC 2 : Wind Energy resources and feasibility
